WE ARE PROBLEM SOLVING

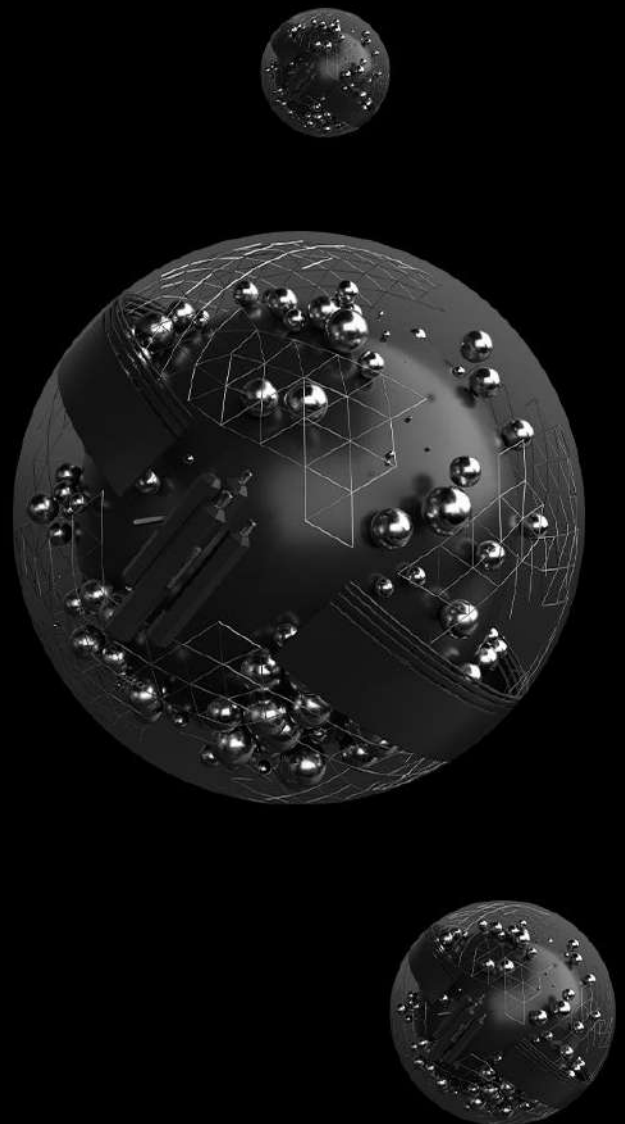

We are New York based software
development company

3D Cube is a result oriented digital hub for designers, developers, creatives, and animators harnessing the power of growth on digital platforms since 2012. We strive for growth, and towards progress. We are a team of creative, and tech savvy professionals where you'll see how strategy meets creativity resulting in sustainable growth for our client's business. We deliver on it through effective strategies for our clients in 20+ industries including Banking, Automotive, FinTech, EdTech, Consulting and FMCG.

3D Cube is a power house of digital. We bring digital solutions for brands and solve their existing challenges. Our team of designers, creatives, developers, animators is here for you. We know your challenges and we solve them.

We build solutions for our clients, and we make sure each of our client is satisfied. We help you reach your desired business goals through our effective and integrated digital strategy designed for each client.

CONCEPT

Three dimensional beyond services that provides the perception in depth. 3-D services are interactive so that users feel involved with the Brand. In this project I mixed two visual approaches to create the identity of their Brand. Summing up the concept 3D (getting closer to the idea of astronomy and universe that the company has served) and services visualization, that got me closer to the purpose of the brand.
